Week 9

Steve Mussmann & Alla Petrakova

First Draft

-Introduction, Methodology, and Results

-No Abstract, Pipeline figure, Comparison, or Conclusion

Quantitative Measures

-Trajectory Literature does not contain quantitative measures for unlabeled data sets

-Quantitative measures are used compare trajectory clusters to "ground truth"

Post-Processing

-Hard to compare motion patterns to outputs of other algorithms

-Convert motion pattern representation to trajectory clusters

  -DTW in feature space

  -Discriminative Motion Patterns

-Compare to "ground truth" or compute internal clustering index
