# Visual Question Answering

Gera Versfeld, Yifan Ding, Boqing Gong

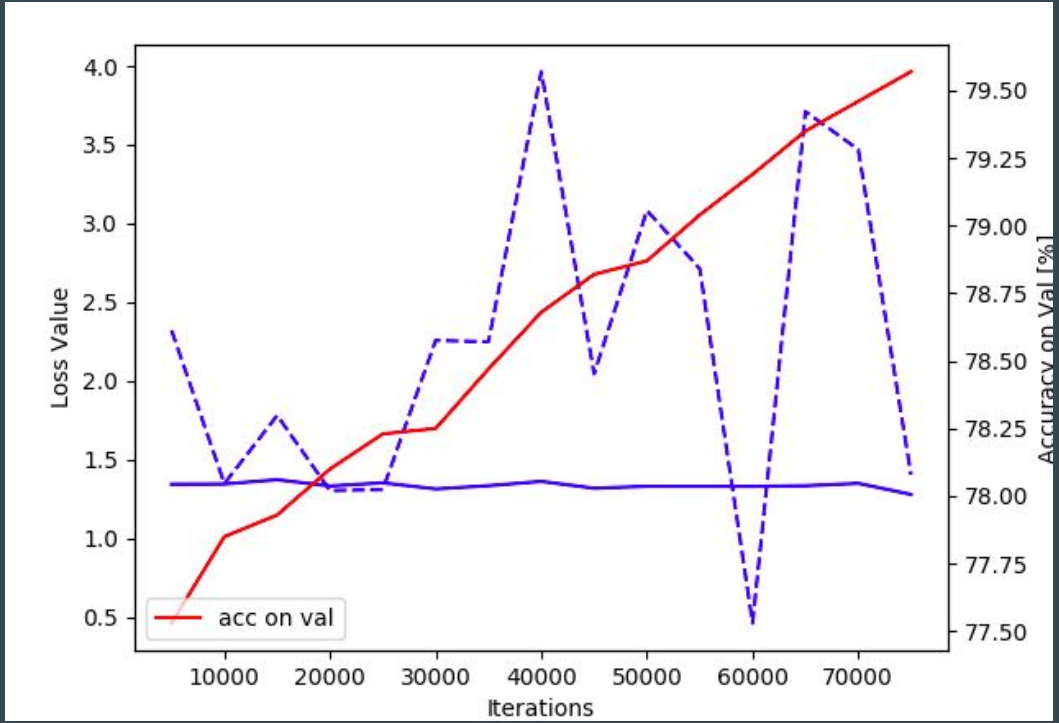

# More fine-tuning of baseline

- Highest validation accuracy - 78.26%
- Hightest test-dev accuracy - 61.95

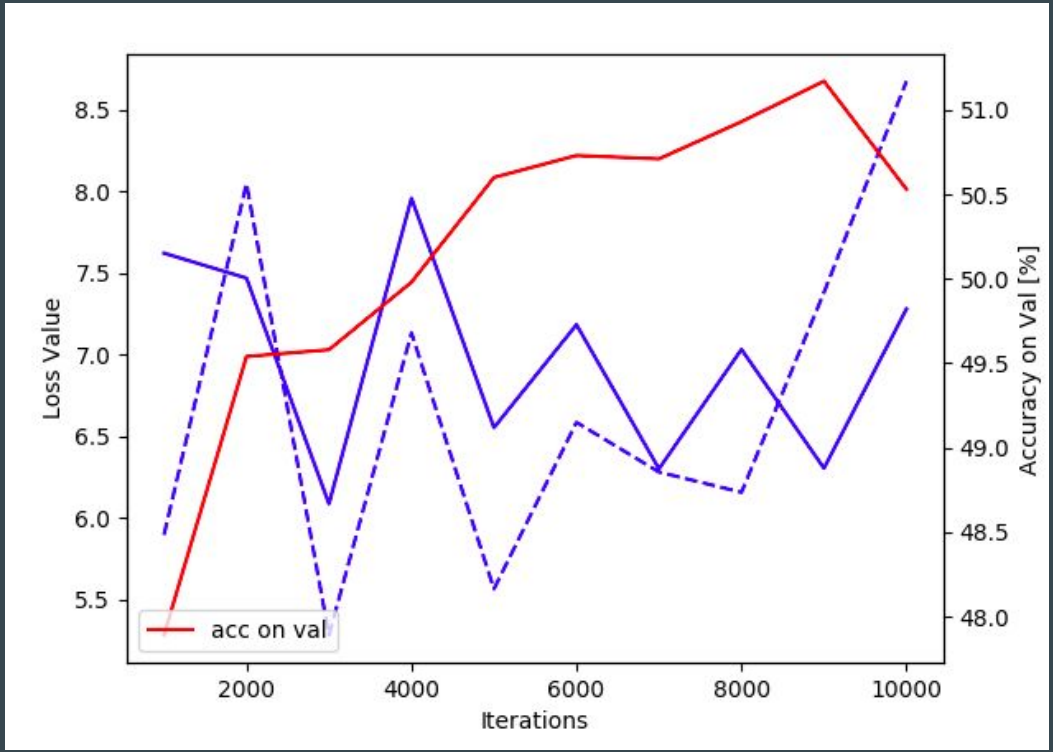

# Fine-tuning MCB with Word2Vec

- Highest accuracy on validation - 80.43%
- Highest accuracy on test-dev - 62.21%

# Training Baseline Regression Model

- Highest validation accuracy - 51.17%
- Long evaluation time is an issue

# Next Steps

- Regression model with word2vec
- Regression model using new attention mechanism
