**RE: MICCAI 2023 Young Scientist Publication Impact Award**

Dear Wenxuan Wang, Chen Chen, Meng Ding, Hong Yu, Sen Zha, and Jiangyun Li

On behalf of the Medical Image Computing and Computer Assisted Intervention (MICCAI) Society, I want to congratulate you on being a finalist for the MICCAI 2023 Young Scientist Publication Impact Award. The winner of this award was announced at the 26<sup>th</sup> International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI 2022) held in Vancouver, Canada from October 8-12, 2023.

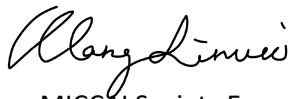

Each year, the MICCAI Society Young Scientist Impact Award recognizes a MICCAI conference publication, authored by a young scientist, that was presented at the main MICCAI Society annual conference within the prior five years and has subsequently had a significant impact on the field of medical image computer and computer assisted intervention.

You have been selected as a finalist for the MICCAI 2023 Young Scientist Publication Impact Award as a co-author of the paper titled "*TransBTS: Multimodal Brain Tumor Segmentation Using Transformer*", originally presented at MICCAI 2021.

While your paper was not selected as the winner this year, please know that being considered for this recognition speaks highly of the contributions your papers has made on the field of medical image computing and computer-assisted medical interventions. The members of Award Selection Committee had a difficult time deliberating among the short-listed candidates but ultimately we can select only one winner.

Congratulations again on receiving this recognition. Best of luck in your future endeavours.

Regards,

Linwei Wang, MICCAI Society Executive Secretary  
on behalf of the Awards Selection Committee
