ARMY EDUCATIONAL OUTREACH PROGRAM

IT STARTS HERE.

The High School and Undergraduate Research Apprenticeship Programs (HSAP/URAP) are commuter programs for high school juniors and seniors or undergraduates who demonstrate an interest in science, technology, engineering, or mathematics (STEM) to work as an apprentice in an Army-funded university research laboratory.

HSAP/URAP is designed so that selected students can apprentice in fields of their choice (among available opportunities) with experienced scientists and engineers full-time during the summer.

Visit the AEOP website at **www.usaeop.com** for more information on this program and other STEM learning opportunities, and to find locations in your area. If you find one that interests you, please apply!
