Masters of Science in Computer Vision

CENTER FOR RESEARCH IN COMPUTER VISION | CRCV
COLLEGE OF ENGINEERING & COMPUTER SCIENCE
UNIVERSITY OF CENTRAL FLORIDA • ORLANDO, FL
Why MSCV at UCF?

Study under the guidance of world renowned researchers

Computer Vision at UCF ranked #10 in the USA in 2020 according to CSRankings.org

CRCV faculty received $3.8 million of research funding in FY2020

National Academy of Inventors names UCF Computer Vision Pioneer and Director of CRCV as Fellow

UCF team won worldwide competition, Activities in Extended Video Challenge for 2020 sponsored by NIST

Computer Vision ranked 13th on Indeed’s 2019 “Best Jobs in the U.S.” list

US Bureau of Labor Statistics estimates a 19% growth between 2016-2026 for computer and information research scientists

“The world is producing more visual data than ever before, so the demand and applications for computer vision are expanding at a rapid pace.”

— MUBARAK SHAH, CRCV DIRECTOR
The Master of Science in Computer Vision (MSCV) Program aims to provide technical skills and domain knowledge to the future professionals who seek to acquire expertise in Computer Vision and its related areas. This involves proficiency in acquiring, processing, analyzing, and understanding images, videos, 3D data, and other types of high-dimensional data of the real world. The program consists of a total of 30 credit hours. The fast-growing interests and investments in Artificial Intelligence (AI) in the United States and around the world have to be powered by a well-prepared workforce. This program contributes to meeting the need created by the United States' shortage of AI personnel.

ADMISSION REQUIREMENTS

For admission, a 3.0 GPA and an undergraduate degree in Computer Science, Computer Engineering, and Mathematics is desirable but not required. Applicants without a strong undergraduate background in Computer Science must demonstrate an understanding of the material covered in the following undergraduate courses by either taking these courses or by being tested on the material.

- EEL 4768 Computer Architecture
- COP 4020 Programming Languages I
- COP 4600 Operating Systems
- COT 4210 Discrete Computational Structures

Applicants who lack background in the above courses may show knowledge in the following courses:

- CAP 4453 Intro to robot vision
- COP 3503C Computer Science II
- MAS 3105 Matrix Algebra
- STA 4163 Statistical Methods II
Dr. Mubarak Shah is Trustee Chair Professor of Computer Science and the founding director of the Center for Research in Computer Vision (CRCV) at UCF. He is a fellow of the National Academy of Inventors, IEEE, AAAS, IAPR, and SPIE.

CRCV is also home to computer vision faculty members Drs. Abhijit Mahlanobis and Yogesh Rawat as well as Courtesy Faculty, Dr. Ulas Bagci.

Drs. Niels da Vitoria Lobo and Hassan Foroosh are both faculty members in the Computer Science faculty who specialize in the area of computer vision.
**DEGREE REQUIREMENTS**

The MS degree will be 30 credit hours at the graduate level. There are 8 required courses of 3 hours each (thus totaling 24 credit hours). The required project course is one of the 8 required courses. The remaining 2 additional courses (6 credit hours) would be selected from a list of 6 restricted electives, each of which is 3 credit hours. No thesis is required, but one of the required courses is a project course that meets the independent learning requirement.

**Required Courses:**

1. CAP 5415 - Computer Vision
2. CAP 5610 - Machine Learning
3. CAP 6411 - Computer Vision Systems
4. CAP 6412 - Advanced Computer Vision
5. CAP 6419 - 3D Computer Vision

**Elective Courses:**

1. CAP 6908 - Independent Study I
2. CAP 5516 - Medical Image Computing
3. STA 6106 - Statistical Computing I
4. COT 6505 - Computational Methods/Analysis I
5. CAP 6908 - Independent Study II

**APPLICATION DEADLINES**
